# F1

The F1 is an adaptable centrifugal humidifier or adiabatic cooler that can also double as a chemical applicator. It is designed to be installed in front of a circulation fan to achieve the desired fog distribution. The F1 is used in greenhouses, crop storages, livestock operations, and anywhere industrial & agricultural humidification and cooling could be needed.

All Forte Humidifiers have been carefully designed and constructed with materials that resist corrosion from water and acids, and thus can be used as chemical applicators. Installation requires only a standard power connection and water source. The fog rate for each model is easily adjustable by a manual valve to achieve the desired amount of humidity or cooling. By operating without nozzles which are more subject to clogging, Forte Humidifiers are able to work in almost every environment, ensuring reliability and durability over time. Forte Humidifiers are a cost effective, low maintenance solution for your humidity and cooling needs.

## Specs:

Adjustable Fog Rate:	0-10.5 gallons per hour
Voltage:	120V, 60HZ*
Power:	420W
Weight:	15.4 pounds
IP Rating:	56
Height:	21.7 in
Width:	16.9 in
Depth:	12.0 in

\*Different voltage, frequency available upon request
